- Transport 15-minute walk from Higashi-Akiru or Akigawa (JR Itsukaichi line). Free parking available

Akirudai Park is situated at almost the center of the Akirudai Plateau that stretches between the Akigawa and Hiraigawa Rivers, tributaries of the Tamagawa River. It is surrounded by pastoral landscape, reminiscent of the Musashino region of old. The park is blessed with a natural environment where one can see the Akigawa and Takiyama Hills south of Akigawa River, the Hamura Kusabana-kyuryo Nature Park to the north of the Hiraigawa River, and the mountains of Okutama to the west.

Currently, approximately 11.84 hectares of the planned 15-hectare park has been completed. Its tree shaped fountain becomes a splashing pond during the summer months. The rose garden and all-weather athletic field are also highlights of the park.

Athletic field

This athletic field with its 400-meter allweather track can hold 6,700 spectators. Along with the adjacent Akiruno City sports facilities (gymnasium, tennis court, pool, etc.), it forms the core of a large sports zone and is a major sports center for the western Tama region.

Splashing Pond

Rose garden

Opened / June 1, 1988 Area / 118,447.07 m² Trees / Tall trees : 1,800, shrubs : 15,600 m², Grass : 30,100 m²
