● Transport 15-minute walk from Kameari (JR Joban line connection to Chiyoda line). Toll parking facilities available (24 hours).

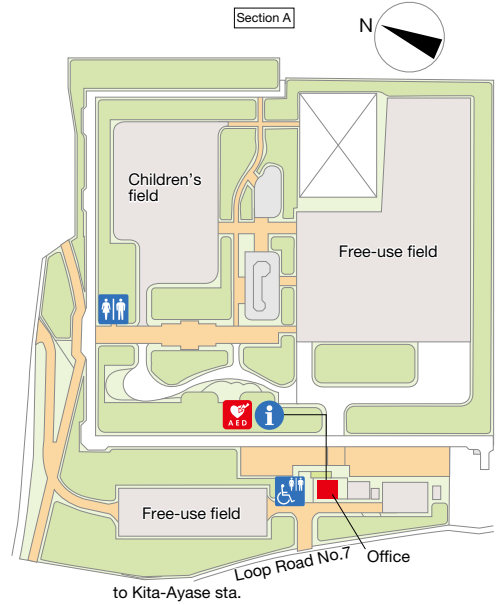

Nakagawa Park is sandwiched between Nakagawa River flowing in eastern Tokyo and Loop Road No. 7, and divided into Section A and B. Climb the stairway at the park entrance of the Loop Road No. 7 side in Section A and you hear the sound of flowing water. The reason for that is that the park is built on the roof of a wastewater processing plant.

A District Momiji (Japanese Maple) Zone

Someiyoshino (cherry) in full bloom
