

# Map of Inundation Duration for Asakawa River, Ōguri River And Misawa Rivers Basin

## 1. About this map

(1) Pursuant to the provisions of the Flood Control Act, this map shows the duration of inundation for the maximum assumed rainfall for sections subject to flood warnings and those subject to water-level notification of the Asakawa River, Daigo River, Yamairi River, Ozu River, Shiroyama River, Osawa River, Goreiya River, Minami-Asakawa River, Annai River, Kawaguchi River, Yamada River, Yudono River, Hyōe River, Yaji River, Hodokubo River, Ōguri River, Ōta River, Kotta River, Misawa River.

(2) This river flood risk map shows the estimated duration of 50cm or deeper inundation that occurs due to overflow of the Asakawa River, Ōguri River and Misawa River basin resulting from the maximum assumed rainfall. The simulation is based on the situation of the river channels and flood control facilities as of the time of the map's publication.

(3) Because the simulation does not take into account flooding of tributaries or flooding caused by rainfall greater than the assumed level, by a storm surge, or by runoff of rainwater, the actual duration of inundation may differ from the estimates and inundation may also occur in areas not indicated on this map.
